

One Stop Floors — Google Ads Audit + Plan (new /ads-skill framework)

Account 750-765-2535 · onestopfloors.com.au · 30-day window · read-only, no changes · 2026-07-11 AEST · ads_ _all.
Audited using the just-installed claude-ads skill's 80-check Google framework (6 weighted categories → Health Score).

Owner Summary (plain English)

- **Health Score ≈ 60/100 — solid account, a few costly leaks.** Strong traffic (9.4% CTR, 1,263 clicks, \$2.65 CPC) and value is now tracked (\$3,590, ~1.07 ROAS).
- **Biggest issue (new finding):** the "Submit lead form" (imported from Analytics) is **still counting 35 of 70 conversions** — it counts the SAME form submits as "Form Submit-Web" (14), so form leads are inflated **2-3×**. The earlier fix demoted it at the action level, but the *goal* is still biddable + counts MANY-per-click. Real form leads ≈ 14, not ~49.
- **Enhanced Conversions is OFF** (data terms are accepted — it just needs turning on).
- **~\$250/mo wasted** on broad research terms (vinyl flooring \$101/0 conv, timber, "flooring near me").
- **Ads have only sitelinks** — no callouts, snippets, call or location assets.

Health Score by category

Performance (30d)

\$3,343	1,263	9.4%	\$2.65	70	\$3,590	\$48
Spend	Clicks	CTR	CPC	Conv (inflated)	Value · ROAS 1.07	CPA

Campaign	Type	Bidding	Budget	Spend	Conv	Impr share
Search-Camp-01	Search	Manual CPC	\$60/d	\$1,832	36	10%
Search-Camp-Commercial	Search	Manual CPC	\$30/d	\$911	13	18%
Visit Our Flooring Shop	Smart	Target Spend	\$20/d	\$599	21	0% (not serving)

Conversion tracking (25% weight) — the leak

Reported conversions (70/30d): GA4-import inflates form leads 2-3x

Double-count still live. "Submit lead form" (GA4 import, id 7004895990, MANY_PER_CLICK) = 35 and "Form Submit-Web" (id 7615305340, ONE_PER_CLICK) = 14 — both are SUBMIT_LEAD_FORM measuring the same submits. The action is marked secondary, but the **GA4-origin SUBMIT_LEAD_FORM goal is still biddable**, so it counts. Fix = demote the *goal* (customer/campaign conversion goal), not just the action. Also "Contact Us" (codeless, MANY_PER_CLICK) is still primary.

Findings (skill framework: PASS / WARNING / FAIL)

Check	Verdict	Detail
Conversion double-count (form leads)	FAIL	GA4-import 35 + Form-Submit-Web 14 = same submits counted 2-3x
Enhanced Conversions for leads	FAIL	OFF (data terms accepted) — turn on Google-tag EC
"Contact Us" codeless action primary	WARNING	MANY_PER_CLICK, still primary → demote (UI)
Conversion value set	PASS	\$3,590 value tracked → ROAS possible
Broad match on Manual CPC	FAIL	17 broad keywords on manual bidding — skill rule: broad ONLY with Smart Bidding
Wasted spend (search terms)	WARNING	vinyl flooring \$101/0, timber \$28/0, "flooring near me" \$18/0, "carpet 3 rooms \$499" \$13/0 (~\$250/mo)
Negative coverage	PASS	9 shared lists (~3,670 members) — strong; add the new junk terms
Match-type discipline	PASS	128 exact / 41 phrase / 17 broad — mostly tight
Quality Score	WARNING	low-QS keywords present (QS 2, 3, and many 5s) → fix relevance/LP or pause
Ad assets	WARNING	only 5 sitelinks — no callouts, structured snippets, call, or location assets
Smart campaign serving	WARNING	Impr share 0% — likely not serving; review or pause \$20/d

Prioritised action plan (read-only recommendations — Shahab GO to apply)

#	Priority	Action	Impact
1	CRITICAL	Demote the GA4-origin SUBMIT_LEAD_FORM goal to non-biddable (not just the action) so form leads aren't counted 2-3x	true CPA/ROAS; clean bidding signal
2	HIGH	Turn ON Enhanced Conversions for leads (Google tag) — terms already accepted	better match + attribution
3	HIGH	Demote "Contact Us" codeless action (MANY_PER_CLICK) in the Ads UI	stop over-count
4	MED	Move Search campaigns to Smart Bidding (Max-Conv / tCPA — value is set) OR drop the 17 broad keywords; add negatives (vinyl/timber/near-me/junk)	cut ~\$250/mo waste
5	MED	Fix or pause low-QS keywords (2-3); align ad ↔ landing page	lower CPC, higher rank
6	MED	Add callouts, structured snippets, call + location assets	higher CTR + ad rank
7	LOW	Review/pause the non-serving Smart campaign (\$20/d, 0% IS)	reallocate budget

Biggest win vs the previous audit: the new framework caught that the form-lead **double-count is still live at the goal level** (the earlier fix only demoted the action) — that alone means the real lead count + CPA are materially better than reported. **Do first:** the goal demotion + Enhanced Conversions.
